

SOCIETY CONFERENCES

Interventional cosmetics- recent advances in facial procedures

Date:

Monday 1 February 2010

Venue:

**Royal Society of Medicine
1 Wimpole Street,
London, W1G 0AE**

CPD:

Applied for

Interventional cosmetics is the most rapidly growing branch of medicine and dentistry today, and has fired the public's imagination. Improvements in treatment methods and treatment devices are continually extending the ability of doctors and dentists to provide aesthetic enhancement, not only for patients with illness but also for healthy people, whether old or young.

This symposium aims to provide an **update in the latest trends and techniques in interventional cosmetics** with respect to the face. Following this symposium delegates will be conversant with recent advances in knowledge and skills in this area.

Topics include

- Ageing of skin and fat
- Ageing of the gums, teeth and bones
- Cosmetic lasers – what's new?
- Needling
- Botulinum toxin – advanced techniques
- Fillers – advanced techniques
- Volume
- Complications
- Implementation- interactive session

Faculty includes

- **Dr Pierre André**
Consultant Dermatologist, France
- **Dr Ashraf Badawi**
National Institute of Laser Enhanced Sciences, Egypt
- **Dr Koenraad de Boulle**
Consultant Dermatologist, Belgium
- **Mr Mike Comins**
Cosmetic Surgeon, London
- **Dr Des Fernandes**
Plastic and Reconstructive Surgeon, South Africa
- **Dr Elaine Halley**
Dental Surgeon, Perth, Scotland
- **Mr Niall Kirkpatrick**
Consultant Plastic Surgeon, London
- **Mr Ian Mackay**
